**ABThera™ SensaT.R.A.C.™ OA Dressing**

ABThera™ SensaT.R.A.C.™ OA Dressing is designed for use with the negative pressure wound therapy provided by the InfoV.A.C.® and V.A.C.Ulta™ Therapy Units. When using the V.A.C.Ulta™ Therapy Unit, do not select the V.A.C. VeraFlo™ Instillation Mode.

### Indications for Use

- Intended care setting is a closely monitored area within the acute care hospital, such as the ICU. The limited to, abdominal compartment syndrome.
- Intended use of this system is for use in open abdominal wounds with exposed viscera, including, but not limited to, abdominal wall entries necessary.
- Temporary bridging of abdominal wall openings where primary closure is not possible and/or repeat abdominal dressings will most often be applied in the operating theater.

### Contraindications

- Patients with open abdominal wounds containing non-enteric unexplored fistulas should not be treated.
- Protect vital structures with ABThera™ Visceral Protective Layer at all times during therapy. Never place exposed foam material directly in contact with exposed bowel, organs, blood vessels or nerves.
